

Clarion-Goldfield-Dows CSD Accessibility Plan

CGD Elementary

The original building was built in the 1930's. There are three areas that are inaccessible without accommodations, the elementary gymnasium and restrooms that are off landings, mid-level between the first and second floor.

Spectators of events in the elementary gymnasium are able to sit at entrance level without additional accommodations. Participants of activities on the gymnasium floor require the use of a motorized "stair creeper". A multipurpose room is on ground level discharge and available for physical education and other programs also held in the elementary gymnasium.

The mid-level restrooms are not accessible. Students and adults have access to handicap restrooms on the first floor. Signage identifies the location of these facilities.

The library/multipurpose addition of 1993, shared with the middle school is accessible.

CGD Middle School

The original middle school buildings were built in the 1950's. The library/multipurpose addition of 1993, shared with the middle school is accessible. The 2002 north addition and 2006 entrance addition are accessible.

The only area not accessible is the shared vocal/instrumental music room. Students in music sit at the lowest level, the same level as ground level discharge.

CGD High School

The original high school building was built in 1969, with additions in 2004 and 2006. The 2004 addition brought locker rooms Title IX compliant and addition of Art studio, wrestling room, and geothermal heating and cooling for the vocational wing and gymnasium. The 2006 project added a spacious library, classrooms, and geothermal heating and cooling for the academic wing. The additions are accessible.

The high school is a single-story building with the majority of the building accessible. Areas not on the ground level discharge include the Industrial Technology shop, Vocational Agriculture shop, stage, vocal music room, and instrumental music room. Wheelchair lifts were installed in the vocal music room and industrial technology shop. The vocational agriculture shop is accessible through the industrial technology shop. The stage is accessible via a portable wheelchair lift. A wheelchair lift for the band room is projected to be installed by August 2019.
